

## Project Overview

Client: Qantas Airways Limited  
Completed: 2012  
Value: \$6,000,000.00

This is stage 1 of an upgrade of the Domestic Terminal Building at Sydney Airport to provide for up to 8 Code E Aircraft parking positions. This complex project successfully provides a MARS gate which can serve 2 Code C aircraft simultaneously or one Code D/E aircraft and will enable the commencement of the larger project. The project involved designing within extremely tight tolerances and ensuring that the appearance of all finishes such as glass, cladding and internal panelling matched the existing surrounds built 10 years prior, whilst all having to comply with today's standards.
