

Project Overview

Client: Strata Plan 10

Completed: 2014

Value: \$875,000.00

This project, involved a complete refurbishment of the complete façade of a unit building in Vaucluse. The scope also included significant concrete cancer repairs, as well as wall strengthening, render, replacement of all external windows and doors, balcony balustrades, and internal circulation spaces including stairs. The work was completed with concurrence of council as exempt development and has significantly increased the value of the units, which is evidenced by recent sales.
